#### **DETAILED ACTION**

## **Drawings**

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the flat sheeted bag with at least a central seam (claim 2), the circular woven tube without an identifiable seam (claim 2) and the interior surface or exterior surface being provided with a polymeric coating (claims 9 and 20) must be shown or the features canceled from the claims. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1, 5, 6, 15, 16, 18 and 19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 4,491,959 to Loefberg.
- 4. Claims 1, 3-7 and 15-19 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Great Britain Patent Specification No. 1,162,013 to the Union Carbide Corporation.

#### Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Loefberg or Union Carbide Corporation.

Loefberg and Union Carbide Corporation each disclose the claimed invention except for the pleated tube being a flat sheeted bag having at least a central seam. It would have been obvious to one having ordinary skill in the art at the time the invention

was made to form the pleated tubes of Loefberg or Union Carbide Corporation from a flat sheeted bag having at least a central seam since it was known in the art that pleated tubes can be made from seamless tube of material or from a flat sheet that has been folded together with its edges forming at least a central seam.

7. Claims 3, 4, 12 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Loefberg and Union Carbide Corporation.

Loefberg discloses the claimed invention except that vent configurations are round instead of slits. Union Carbide Corporation shows that oval or elliptical vent configurations are equivalent structures known in the art. Therefore, because these two vent configurations were art-recognized equivalents at the time the invention was made, one of ordinary skill in the art would have found it obvious to substitute the round vent configurations of Loefberg for the oval or elliptical vent configurations of Union Carbide Corporation.

8. Claims 8-14 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Loefberg or Union Carbide Corporation.

Loefberg and Union Carbide Corporation each disclose the claimed invention except for the package being constructed of woven polyolefin fabric with a polymeric coating. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use woven polyolefin fabric with a polymeric coating for the packages of Loefberg or Union Carbide Corporation, since it has been held to be within

the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

#### Conclusion

- 9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 10. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06 II(A), MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jes F. Pascua whose telephone number is 571-272-4546. The examiner can normally be reached on Mon.-Thurs..

Art Unit: 3727

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan J. Newhouse can be reached on 571-272-4544. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
